## Projects

---

### API Buddy (React, Node.js, MongoDB, Google Gemini) 📄 🔗

### AI-Powered API Testing Platform

- Developed API Buddy, an AI-powered platform integrating Google Gemini for automated error analysis and failure explanations in API testing.
- Designed a dual-tab interface supporting both manual API requests and batch testing from Postman collections, improving test management and efficiency.
- Built a responsive UI using React and TailwindCSS, enhancing user experience with features like request previews and real-time test results.
- Implemented a backend system for storing test histories and detecting API security vulnerabilities, ensuring improved debugging and secure API development.

### Enlighten (React, TailwindCSS, Appwrite) 📄 🔗

### Blog App

- Designed and built a full-featured blogging platform using React.js, TailwindCSS, and Appwrite, enabling users to create, publish, and manage blogs with secure authentication powered by Appwrite.
- Integrated React Hook Form for efficient input handling and implemented a rich text editor (TinyMCE) for a seamless content creation experience.
- Leveraged Redux for optimized state management, ensuring smooth and responsive user interactions.
